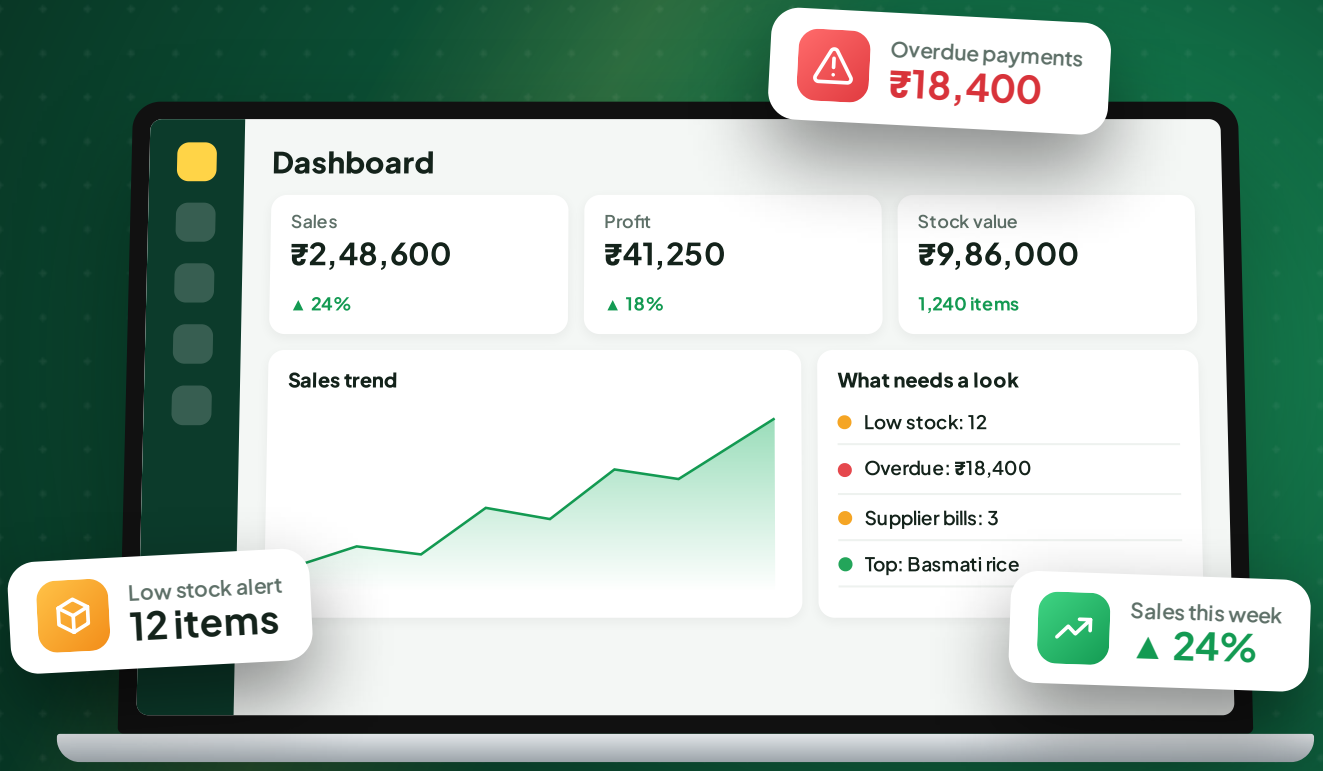
Smart business insights

GrocerOS

Supermarket & Grocery ERP

POS billing, inventory, GST, accounting and smart business insights, in one system built for the way your store works.



POS | GST billing | Inventory | Accounts | Reports

www.craftssoftware.com

info@craftssoftware.com

One system for the whole store

Grocer OS brings the counter, the stockroom and the books together. Every sale, purchase and payment updates stock, balances, GST and accounts automatically, so the owner always sees the true picture.

1
system for billing, stock and accounts

0
monthly subscription fees

5 min
install on shared hosting

Built for

Supermarkets
Busy counters, many products, several staff

Grocery & kirana stores
Fast billing, credit customers, daily cash

Retail shops
Any single store selling from stock

Why Grocer OS

Fast at the counter
Barcode scan, keyboard shortcuts and one-tap payments keep the queue moving.

Shows what needs attention
The dashboard flags low stock, overdue payments and slow items every day.

Accounting done for you
Double-entry books, GST and party balances update in the background.

Control over staff
Roles, discount limits, manager approvals and a full audit log.

Your data, your server
Runs on normal shared hosting. Nothing leaves your own server.

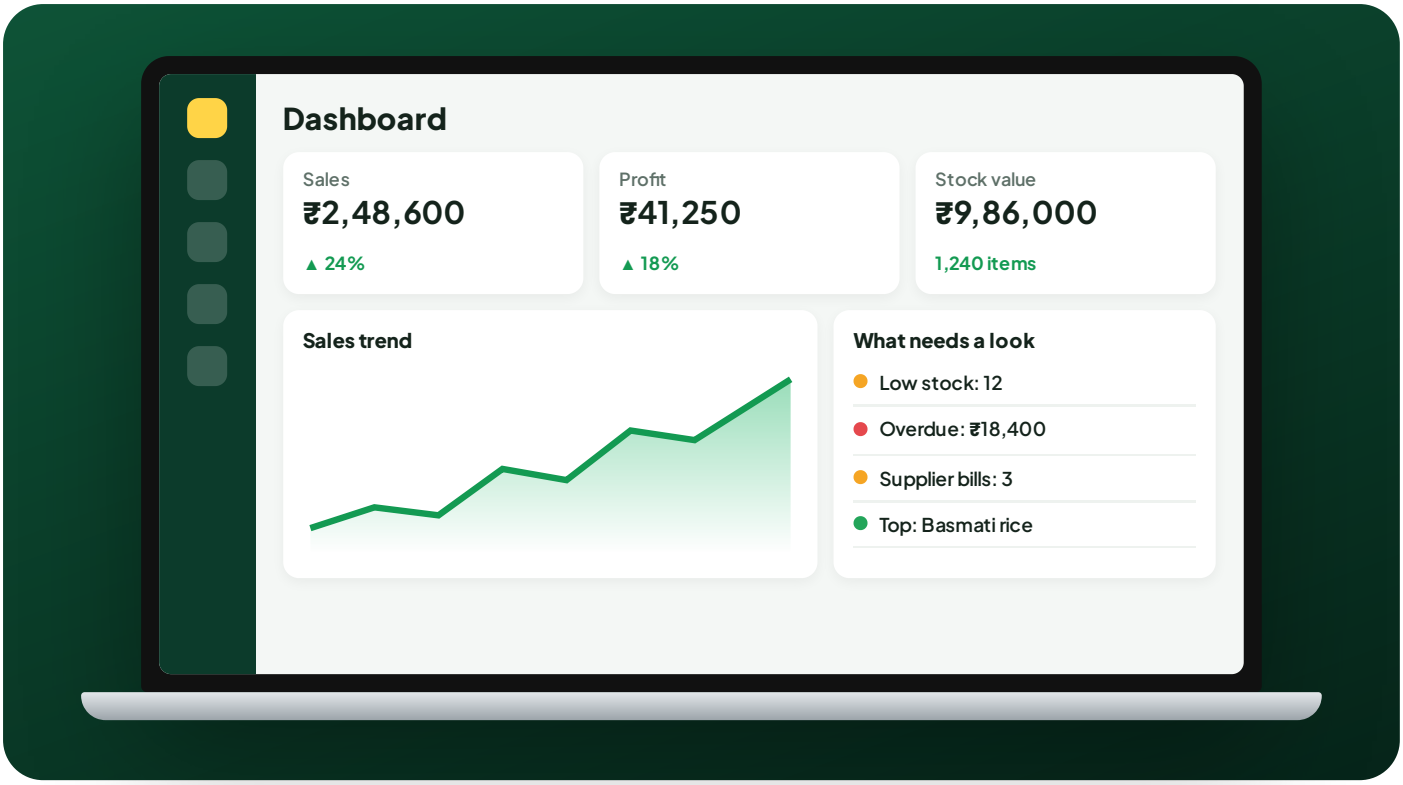
Made to fit
We customize Grocer OS to your store, or build custom software.

A day in the store

1. **Open** — Check the dashboard
2. **Sell** — Bill at the POS
3. **Buy** — Enter supplier purchases
4. **Collect** — Record payments
5. **Close** — Count cash, take a backup

Know what needs a look, every day

Grocer OS doesn't just record sales. The dashboard reads your data and brings the important things to the top, so you act before a problem grows.



Low stock alerts
See which items are running out before shelves go empty.

Overdue payments
Know who owes you, how much, and for how long.

Highest outstanding
Customers with the biggest balances, ready to follow up.

Pending supplier bills
Bills you still need to pay, so nothing is missed.

Top sellers and best customers
Your best products and most valuable customers.

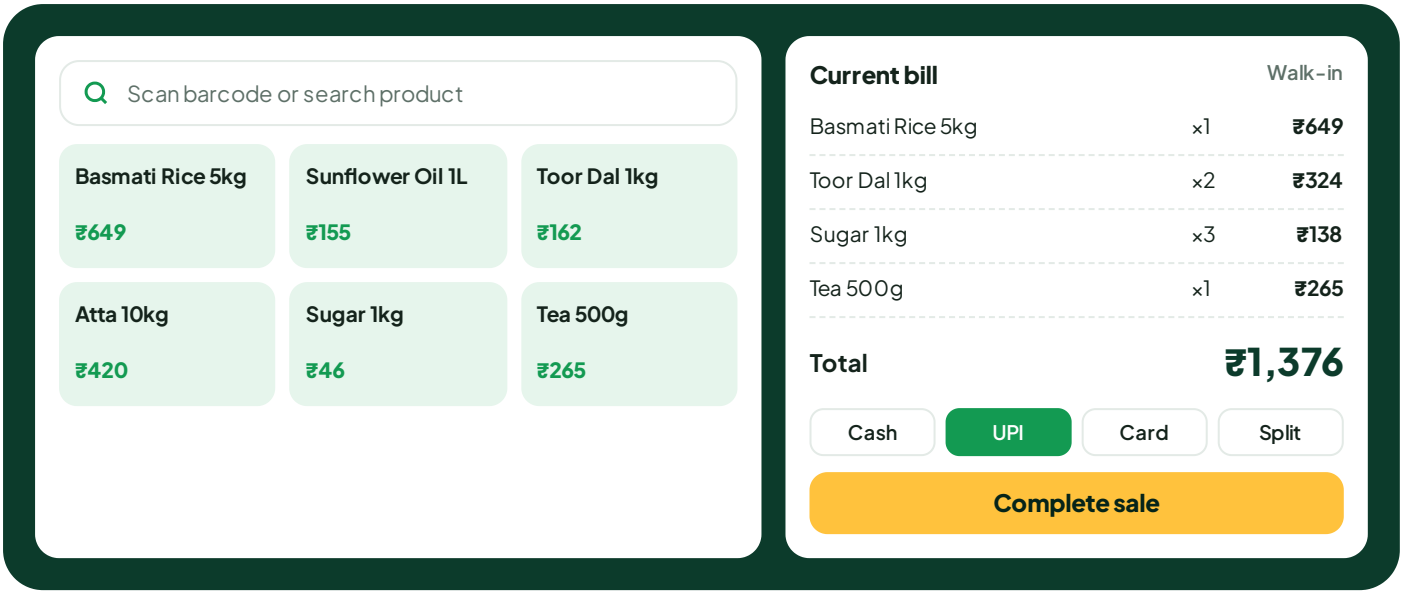
Slow-moving stock
Items with no sale in 30 days, tying up your money.

Highest expense
Where most of your money is going this period.

Period comparison
Sales, collections and profit compared with the previous period.

A counter built for speed

The POS screen is designed for busy hours. Scan or search, adjust a line, take payment and print, mostly from the keyboard.



Scan or search

Barcode scanning, product search and tap-to-add tiles. Scanning again adds one more.

Every way to pay

Cash, UPI, card and bank, split across methods, with change worked out.

Credit sales

Choose a customer and use Pay later to put the bill on their account.

Hold and resume

Park a bill to serve the next customer. Unsaved bills come back after a closed tab.

Receipts and invoices

80mm thermal receipts and A4 GST tax invoices.

Share on WhatsApp

Send invoices straight to the customer.

Quotations and challans

Quote a price or send goods first, then convert to an invoice in one click.

Keyboard shortcuts

F4 customer, F8 payment, Ctrl P print, Ctrl K to find anything.

Stock that is always right

Stock moves with every sale, purchase, return and adjustment, and is valued automatically. You always know what you have and what it is worth.

Product	In stock	Avg cost	Value	Status
Basmati Rice 5kg	84	₹560	₹47,040	In stock
Sunflower Oil 1L	9	₹132	₹1,188	Low stock
Toor Dal 1kg	146	₹138	₹20,148	In stock
Green Tea 100g	0	₹180	₹0	Out of stock

Purchase entry
Choose the supplier, add products and enter what you paid. Stock and supplier balance update together.

Live stock and value
Current quantity and value of every product, using weighted-average cost.

Stock adjustments
Fix counts after a shelf check, or write off damaged, expired or lost goods.

Products, categories and brands
Organise your catalogue and edit products any time.

Returns and corrections

Sales returns
Stock, customer balance, GST and profit are corrected together. Refund, or keep it as credit.

Purchase returns
Send goods back to the supplier with debit notes.

Credit and debit notes
Proper documents for every return, ready for GST.

Safe cancellation
Cancel a wrong invoice or bill with a reason. Everything reverses, and Copy starts a corrected one.

Grocer OS protects against double clicks and refuses to cancel an invoice that has returns, or a purchase whose stock is already sold, so the books stay consistent.

Every rupee in and out, tracked

Payments, credit, cash and bank all live in one place, linked to the right customer, supplier and invoice.

Cash in hand	Bank account	To collect
₹38,450	₹2,14,900	₹25,150

Payments in

Customer payments are applied to the oldest unpaid invoices first, and you can change that.

Payments out and refunds

Pay suppliers, or refund a customer's credit. A separate permission controls money going out.

Advance credit

Advances and unrefunded returns become credit that new bills can use automatically.

Cash and bank

Accounts with opening balances, transfers and a statement for each one.

Expenses and income

Record rent, salary and fuel, or income that isn't a sale, such as interest.

Cancel with one click

A wrong payment, expense or income entry can be cancelled and everything goes back.

Who owes whom

Customer	0–30 days	31–60 days	60+ days	
Sharma Stores	₹4,200	—	—	Remind
Green Valley Hotel	₹6,850	₹3,100	—	Remind
Rahman Traders	—	₹2,400	₹8,600	Remind

Outstanding report with ageing for customers and suppliers, WhatsApp reminders and a full statement for every party. Sample figures shown.

Books that keep themselves

An invisible double-entry accounting engine records every transaction correctly. Your accountant gets proper books, and you never have to learn accounting.

GST at a glance

GST collected on sales	GST paid on purchases	Net GST payable
₹44,750	₹31,200	₹13,550

Reports

Profit & loss
Income, costs and profit for any period

Balance sheet
What the business owns and owes

Trial balance
Check that the books balance

Ledger
Every entry in any account

Day book
All transactions for a day

GST summary
Tax collected and paid

Sales & purchase registers
Invoice-wise GST registers

HSN summary
GST by HSN code

Sales analysis
What sells, when and to whom

Stock report
Quantity and value on hand

Outstanding & ageing
Who owes you and how long

Party statements
Every bill and payment per party

Every report can be printed or exported to CSV for your accountant. Figures on this page are samples.

Stay in control of your store

Give each person the right access, set limits on discounts, and keep a record of every change.

Cashier

- Bills at the POS
- Sells within their discount limit
- Asks a manager above it

Manager

- Approves price exceptions
- Not limited on discounts
- Oversees daily work

Admin

- Full access and settings
- Manages users and rights
- Locks books, runs backups

Users, roles and permissions

One login per person, with rights set by role. Users can change their own password.

Discount limits

Each person has a limit on how far below list price they may sell, covering discounts and lower rates.

Manager approvals

Bills above the limit wait for a manager, who approves them from the Approvals screen. Each approval works once, for that exact bill.

Lock the books

After filing GST, lock everything up to a date. Future-dated entries are refused unless you allow them.

Full audit log

See who did what and when, across the system.

Backup and restore

One-click backup you can download, and restore when needed. No special server tools required.

Built-in safety checks

Warnings for archived or wrong-type parties and missing state details.

Find anything fast

Command palette with Ctrl K to jump to any product, customer, invoice or screen.

Crafts Software

Easy to install.
Ready to grow with you.

Runs on shared hosting

No costly server. Works on normal hosting such as Hostinger with PHP 8 and MySQL.

Install in minutes

Create a database, upload the files, open the installer and fill in the form.

No build tools

No framework, Composer or npm. Plain, fast pages that are easy to maintain.

Guides included

A go-live checklist and a simple user guide for shop staff.

Tech stack PHP 8 · MySQL · PDO · JavaScript · Alpine.js · Chart.js · HTML5 · CSS3

Need something different?

We customize Grocer OS to your store's needs, and we build custom software to your requirements. Customization is quoted separately.
